```

Plugin

Custom Post Type UI
Create and administer custom post types
and taxonomies in WordPress.

webdev
STUDIOS

Settings

Public

True

(default: true) Whether or not the taxonomy should be publicly queryable.

Hierarchical

False

(default: false) Whether the taxonomy can have parent-child relationships.

Show UI

True

(default: true) Whether to generate a default UI for managing this custom taxonomy.

Query Var

True

(default: true) Sets the query_var key for this taxonomy.

Custom Query Var String

(default: taxonomy slug). Query var needs to be true to use.
Sets a custom query_var slug for this taxonomy.

Rewrite

True

(default: true) Whether or not WordPress should use rewrites for this taxonomy.

Custom Rewrite Slug

(default: taxonomy name)
Custom taxonomy rewrite slug.

Rewrite With Front

True

(default: true) Should the permastruct be prepended with the front base.

Rewrite Hierarchical

False

(default: false) Should the permastruct allow hierarchical urls.

Show Admin Column

False

(default: false) Whether to allow automatic creation of taxonomy columns on associated post-types.

Show in REST API

False

(default: false) Whether to show this taxonomy data in the WP REST API.

REST API base slug

Slug to use in REST API URLs.

Show in quick/bulk edit panel.

False

(default: false) Whether to show the taxonomy in the quick/bulk edit panel.

CUSTOM FIELDS

4	Quotes Slider	quotes_slider	Repeater
Field Label	This is the name which will appear on the EDIT page		
Field Name	Single word, no spaces. Underscores and dashes allowed		
Field Type	Repeater		
Instructions	Instructions for authors. Shown when submitting data		
Required?	<input type="checkbox"/> No		

Order	Label	Name	Type
1	Testimonial	testimonial	Post Object
Field Label	This is the name which will appear on the EDIT page		
Field Name	Single word, no spaces. Underscores and dashes allowed		
Field Type	Post Object		
Instructions	Instructions for authors. Shown when submitting data		
Required?	<input type="checkbox"/> No		
Filter by Post Type	× Testimonial ×

Custom Post Type

Arrange your website exterior using Custom Post Types. Structure the content to make it easy to grasp and visually perceptible.

Taxonomy

Group the existing and newly-added post types into specific categories to ensure smooth page-to-page redirecting.

Custom fields

Expand the custom post types. Add as many meta fields as you need for the CPTs to look informative and neat.

Relations

Interrelate each and every custom post type in your arsenal to deliver relevant information on demand.

Options page

Create a special page storing all the additional options that can be further assigned to any custom post type or taxonomy.
